uk newspaper political spectrum: Hidden Agendas John Pilger, 2010-09-02 In this powerful book, journalist and film maker John Pilger strips away the layers of deception, dissembling language and omission that prevent us from understanding how the world really works. From the invisible corners of Tony Blair's Britain to Burma, Vietnam, Australia, South Africa and the illusions of the 'media age', power, he argues, has its own agenda. Unchallenged, it operates to protect its interests with a cynical disregard for people - shaping, and often devastating, millions of lives. By unravelling the hidden histories of contemporary events, Pilger allows us to read between the lines. He also celebrates the eloquent defiance and courage of those who resist oppression and give us hope for the future. Tenaciously researched and written with passion and wit, Hidden Agendas will change the way you see the world.

uk newspaper political spectrum: Corruption and Reform Edward L. Glaeser, Claudia Goldin, 2007-11-01 Despite recent corporate scandals, the United States is among the world's least corrupt nations. But in the nineteenth century, the degree of fraud and corruption in America approached that of today's most corrupt developing nations, as municipal governments and robber barons alike found new ways to steal from taxpayers and swindle investors. In Corruption and Reform, contributors explore this shadowy period of United States history in search of better methods to fight corruption worldwide today. Contributors to this volume address the measurement and consequences of fraud and corruption and the forces that ultimately led to their decline within the United States. They show that various approaches to reducing corruption have met with success, such as deregulation, particularly "free banking," in the 1830s. In the 1930s, corruption was kept in check when new federal bureaucracies replaced local administrations in doling out relief. Another deterrent to corruption was the independent press, which kept a watchful eye over government and business. These and other facets of American history analyzed in this volume make it indispensable as background for anyone interested in corruption today.

uk newspaper political spectrum: The Road to Somewhere David Goodhart, 2020-01-15 A robust and timely investigation into the political and moral fault-lines that divide Brexit Britain and Trump's America -- and how a new settlement may be achieved. Several decades of greater economic and cultural openness in the West have not benefited all our citizens. Among those who have been left behind, a populist politics of culture and identity has successfully challenged the traditional politics of Left and Right, creating a new division: between the mobile achieved identity of the people from Anywhere, and the marginalized, roots-based identity of the people from Somewhere. This schism accounts for the Brexit vote, the election of Donald Trump, the decline of the center-left, and the rise of populism across Europe. David Goodhart's compelling investigation of the new global politics reveals how the Somewhere backlash is a democratic response to the dominance of Anywhere interests, in everything from mass higher education to mass immigration.

uk newspaper political spectrum: The Conservative Party Tim Bale, 2011-02-28 The Conservatives are back - but what took them so long? Why did the world's most successful political party dump Margaret Thatcher only to commit electoral suicide under John Major? Just as importantly, what stopped the Tories getting their act together until David Cameron came along?

The answers are as intriguing as the questions.

uk newspaper political spectrum: Women of Westminster Rachel Reeves, 2019-03-07 In 1919 Nancy Astor was elected as the Member of Parliament for Plymouth Sutton, becoming the first woman MP to take her seat in the House of Commons. Her achievement was all the more remarkable given that women (and even then only some women) had only been entitled to vote for just over a year. In the past 100 years, a total of 491 women have been elected to Parliament. Yet it was not until 2016 that the total number of women ever elected surpassed the number of male MPs in a single parliament. The achievements of these political pioneers have been remarkable – Britain has now had two female Prime Ministers and women MPs have made significant strides in fighting for gender equality from the earliest suffrage campaigns to Barbara Castle's fight for equal pay to Harriet Harman's recent legislation on the gender pay gap. Yet the stories of so many women MPs have too often been overlooked in political histories. In this book, Rachel Reeves brings forgotten MPs out of the shadows and looks at the many battles fought by the Women of Westminster, from 1919 to 2019.

uk newspaper political spectrum: Identity, Ignorance, Innovation Matthew d'Ancona, 2021-03-18 'D'Ancona makes his case well... The book is well written and thoughtful' -- The Times 'A heartfelt attempt to renew liberal ideals for the coming decades... How sorely our public debate needs others to express themselves similarly.' -- Henry Mance, Financial Times 'An urgent and exhilarating account of how populism, prejudice & polarisation have corrupted objective truth and public discourse. D'Ancona's sparkling prose provides an explanation of how we got here and, crucially, how we might get out.' -- James O'Brien 'A book so rich in thought, wisdom and persuasion I find myself sharing the ideas within it with everyone I meet... In the much-mourned absence of Christopher Hitchens, d'Ancona is fast becoming the voice of enlightenment for our bewildered age.' -- Emily Maitlis 'A tonic for our times that blows open any complacency following Trump's defeat that the demise of populism and nativism is inevitable. In beautifully written prose, D'Ancona puts forward hopeful ideas and timely inspiration for a progressive politics to replace it.' -- David Lammy 'A brilliant, lucid, fearless tract, just what the historical moment ordered.' -- Andrew O'Hagan 'D'Ancona's regular practical suggestions help to take it beyond mere theory and into the real world... Decision-makers would do well to read it.' -- Charlotte Henry, TLS *** This is a call to arms. The old tools of political analysis are obsolete - they have rusted and are no longer fit for purpose. We've grown lazy, wedded to the assumption that, after ruptures such as Brexit, the pandemic, and the rise of the populist Right, things will eventually go 'back to normal'. Award-winning political writer Matthew d'Ancona invites you to think afresh: to seek new ways of challenging political extremism, bombastic populism and democratic torpor on both Left and Right. In this ground-breaking book, he proposes a new way of understanding our era and plots a way forward. With rigorous analysis, he argues that we need to understand the world in a new way, with a framework built from the three I's: Identity, Ignorance and Innovation.

uk newspaper political spectrum: Deciding What's True Lucas Graves, 2016-09-06 Over the past decade, American outlets such as PolitiFact, FactCheck.org, and the Washington Post's Fact Checker have shaken up the political world by holding public figures accountable for what they say. Cited across social and national news media, these verdicts can rattle a political campaign and send the White House press corps scrambling. Yet fact-checking is a fraught kind of journalism, one that challenges reporters' traditional roles as objective observers and places them at the center of white-hot, real-time debates. As these journalists are the first to admit, in a hyperpartisan world, facts can easily slip into fiction, and decisions about which claims to investigate and how to judge them are frequently denounced as unfair play. Deciding What's True draws on Lucas Graves's unique access to the members of the newsrooms leading this movement. Graves vividly recounts the routines of journalists at three of these hyperconnected, technologically innovative organizations and what informs their approach to a story. Graves also plots a compelling, personality-driven history of the fact-checking movement and its recent evolution from the blogosphere, reflecting on its revolutionary remaking of journalistic ethics and practice. His book demonstrates the ways these

rising organizations depend on professional networks and media partnerships yet have also made inroads with the academic and philanthropic worlds. These networks have become a vital source of influence as fact-checking spreads around the world.

uk newspaper political spectrum: *Lone Parenthood in the Life Course* Laura Bernardi, Dimitri Mortelmans, 2017-11-08 Lone parenthood is an increasing reality in the 21st century, reinforced by the diffusion of divorce and separation. This volume provides a comprehensive portrait of lone parenthood at the beginning of the XXI century from a life course perspective. The contributions included in this volume examine the dynamics of lone parenthood in the life course and explore the trajectories of lone parents in terms of income, poverty, labour, market behaviour, wellbeing, and health. Throughout, comparative analyses of data from countries as France, the United Kingdom, Ireland, Germany, Belgium, Sweden, Switzerland, Hungary, and Australia help portray how lone parenthood varies between regions, cultures, generations, and institutional settings. The findings show that one-parent households are inhabited by a rather heterogeneous world of mothers and fathers facing different challenges. Readers will not only discover the demographics and diversity of lone parents, but also the variety of social representations and discourses about the changing phenomenon of lone parenthood. The book provides a mixture of qualitative and quantitative studies on lone parenthood. Using large scale and longitudinal panel and register data, the reader will gain insight in complex processes across time. More qualitative case studies on the other hand discuss the definition of lone parenthood, the public debate around it, and the social and subjective representations of lone parents themselves. This book aims at sociologists, demographers, psychologists, political scientists, family therapists, and policy makers who want to gain new insights into one of the most striking changes in family forms over the last 50 years. This book is open access under a CC BY License.

uk newspaper political spectrum: *The Changing Business of Journalism and Its Implications for Democracy* David A. L. Levy, Rasmus Kleis Nielsen, 2010 The business of journalism is widely held to be in a terminal crisis today, in particular because the rise of the internet has drained audience attention and advertising revenue away from existing media platforms. This book, the first systematic international overview of how the news industry is dealing with current changes, counters such simplistic predictions of the supposedly technologically determined death of the news industry. It offers instead nuanced scrutiny of the threats and opportunities facing legacy news organisations across the world in countries as diverse as the United States, the United Kingdom, France, Germany, Finland, Brazil, and India as they transition to an increasingly convergent media landscape.

uk newspaper political spectrum: *Why Evolution is True* Jerry A. Coyne, 2010-01-14 For all the discussion in the media about creationism and 'Intelligent Design', virtually nothing has been said about the evidence in question - the evidence for evolution by natural selection. Yet, as this succinct and important book shows, that evidence is vast, varied, and magnificent, and drawn from many disparate fields of science. The very latest research is uncovering a stream of evidence revealing evolution in action - from the actual observation of a species splitting into two, to new fossil discoveries, to the deciphering of the evidence stored in our genome. *Why Evolution is True* weaves together the many threads of modern work in genetics, palaeontology, geology, molecular biology, anatomy, and development to demonstrate the 'indelible stamp' of the processes first proposed by Darwin. It is a crisp, lucid, and accessible statement that will leave no one with an open mind in any doubt about the truth of evolution.

uk newspaper political spectrum: *British Media Coverage of the Press Reform Debate* Binakuromo Ogbemor, 2020-07-30 This open access book provides a detailed exploration of the British media coverage of the press reform debate that arose from the News of the World phone hacking scandal and the Leveson Inquiry. Gathering data from a content analysis of 870 news articles, Ogbemor shows how journalists cover debates on media policy and illustrates the impact of

their coverage on democracy. Through this analysis, the book contributes to knowledge of paradigm repair strategies; public sphere; gatekeeping theory; the concept of journalism as an interpretive community; political economy of the press; as well as the neoliberal and social democratic interpretations of press freedom. Providing insight into factors inhibiting and aiding the role of the news media as a democratic public sphere, it will be a valuable resource for the press, media reform activists, members of the public, and academics in the fields of journalism, politics and law.

uk newspaper political spectrum: For a Left Populism Chantal Mouffe, 2018 We are currently witnessing in Western Europe a “populist moment” that signals the crisis of neoliberal hegemony. The central axis of the political conflict will be between right- and left-wing populism. By establishing a frontier between “the people” and “the oligarchy,” a leftpopulist strategy could bring together the manifold struggles against subordination, oppression and discrimination. This strategy acknowledges that democratic discourse plays a crucial role in the political imaginary of our societies. And through the construction of a collective will, mobilizing common affects in defence of equality and social justice, it will be possible to combat the xenophobic policies promoted by right-wing populism.

uk newspaper political spectrum: The BBC Tom Mills, 2020-10-13 The BBC: the mouthpiece of the Establishment? The BBC is one of the most important institutions in Britain; it is also one of the most misunderstood. Despite its claim to be independent and impartial, and the constant accusations of a liberal bias, the BBC has always sided with the elite. As Tom Mills demonstrates, we are only getting the news that the Establishment wants aired in public. Throughout its existence, the BBC has been in thrall to those in power. This was true in 1926 when it stood against the workers during the General Strike, and since then the Corporation has continued to mute the voices of those who oppose the status quo: miners in 1984; anti-war protesters in 2003; those who offer alternatives to austerity economics since 2008. From the outset much of its activity has been scrutinised by the secret services at the invitation of those in charge. Since the 1990s the BBC has been integrated into the market, while its independence from government and big business has been steadily eroded. The BBC is an important and timely examination of a crucial public institution that is constantly under threat.

Sunday Times 'Immaculately researched... A powerful reminder that reporters can serve the public good... Should make journalists proud - and may even help to make the world a better place' Peter Osborne, New Statesman Who do our politicians work for? The public, or big business? If you want to understand why British politics isn't working, the first place to start is here. Parliament Ltd reveals the financial interests that British politicians would rather you didn't hear about. From banks and private corporations, to lobbying and the arms trade, there are MPs making millions by moonlighting in second jobs. Where does their loyalty belong - to us or to their paymasters? Meanwhile - years after the expenses scandal - they are now claiming more than ever before. In his enthralling journey to the dark heart of British politics, Martin Williams exposes a hidden, shocking culture of greed and corruption.

uk newspaper political spectrum: Race, Ethnicity and Nation Peter Wade, 2007 Race, ethnicity and nation are all intimately linked to family and kinship, yet these links deserve closer attention than they usually get in social science, above all when family and kinship are changing rapidly in the context of genomic and biotechnical revolutions. Drawing on data from assisted reproduction, transnational adoption, mixed race families, Basque identity politics and post-Soviet nation-building, this volume provides new and challenging ways to understand race, ethnicity and nation.--Back cover

uk newspaper political spectrum: Political Journalism in Comparative Perspective Erik

Albæk, Arjen van Dalen, Nael Jebril, Claes Holger Vreese, 2014-04-28 Political journalism is often under fire. Conventional wisdom and much scholarly research suggest that journalists are cynics and political pundits. Political news is void of substance and overly focused on strategy and persons. Citizens do not learn from the news, are politically cynical, and are dissatisfied with the media. This book challenges these assumptions, which are often based on single-country studies with limited empirical observations about the relation between news production, content, and journalism's effects. Based on interviews with journalists, a systematic content analysis of political news, and panel survey data in different countries, this book tests how different systems and media-politics relations condition the contents of political news. It shows how different content creates different effects, and demonstrates that under the right circumstances citizens learn from political news, do not become cynical, and are satisfied with political journalism.

uk newspaper political spectrum: *Network Propaganda* Yochai Benkler, Rob Faris, Harold Roberts, 2018 This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. Is social media destroying democracy? Are Russian propaganda or Fake news entrepreneurs on Facebook undermining our sense of a shared reality? A conventional wisdom has emerged since the election of Donald Trump in 2016 that new technologies and their manipulation by foreign actors played a decisive role in his victory and are responsible for the sense of a post-truth moment in which disinformation and propaganda thrives. *Network Propaganda* challenges that received wisdom through the most comprehensive study yet published on media coverage of American presidential politics from the start of the election cycle in April 2015 to the one year anniversary of the Trump presidency. Analysing millions of news stories together with Twitter and Facebook shares, broadcast television and YouTube, the book provides a comprehensive overview of the architecture of contemporary American political communications. Through data analysis and detailed qualitative case studies of coverage of immigration, Clinton scandals, and the Trump Russia investigation, the book finds that the right-wing media ecosystem operates fundamentally differently than the rest of the media environment. The authors argue that longstanding institutional, political, and cultural patterns in American politics interacted with technological change since the 1970s to create a propaganda feedback loop in American conservative media. This dynamic has marginalized centre-right media and politicians, radicalized the right wing ecosystem, and rendered it susceptible to propaganda efforts, foreign and domestic. For readers outside the United States, the book offers a new perspective and methods for diagnosing the sources of, and potential solutions for, the perceived global crisis of democratic politics.

It also offers unique comparative case studies of Internet memes in Russia and the United States.

uk newspaper political spectrum: How Press Propaganda Paved the Way to Brexit Francis Rawlinson, 2020-01-21 This book traces how right-wing newspapers in Britain helped shape British public opinion about the European Union over the course of the 20 years preceding the EU referendum in June 2016. The author argues that newspapers such as the Telegraph, Mail, Sun and Express have been effectively waging a long-term propaganda war, with the distortions and borderline fake news presented one of the factors that helped secure the narrow majority for Brexit. Written by an EU insider, the book presents hard facts and debunks the core myths on EU laws, exorbitant budget contributions and uncontrolled immigration, and contributes to the broader debate on the importance of the press for democracy.

uk newspaper political spectrum: *Fractured Politics* John Crabtree, 2011 Latin American opinion surveys consistently point to Peruvian citizens' deep distrust of their elected rulers and democratic institutions. The 2011 presidential and legislative elections in Peru, along with the regional and municipal polls of the previous year, showed once again the degree of political fragmentation in contemporary Peru and the weakness of its party system. *Fractured Politics* examines the history of political exclusion in Peru, the weakness of representative institutions, and the persistence of localized violent protest. It also evaluates the contribution of institutional reforms in bridging the gap between state and society, including Peru's Law on Political Parties, administrative decentralization, and the experience of the Defensoría, or ombudsman's office. The chapters, by leading scholars of Peruvian politics, emerge from a conference, held in 2009 in Saint Antony's College Oxford. Julio Cotler, from the Instituto de Estudios Peruanos (IEP), was the keynote speaker.

uk newspaper political spectrum: Chavs Owen Jones, 2020-10-27 In modern Britain, the working class has become an object of fear and ridicule. From Little Britain's Vicky Pollard to the demonization of Jade Goody, media and politicians alike dismiss as feckless, criminalized and ignorant a vast, underprivileged swathe of society whose members have become stereotyped by one, hate-filled word: chavs. In this acclaimed investigation, Owen Jones explores how the working class has gone from "salt of the earth" to "scum of the earth." Exposing the ignorance and prejudice at the heart of the chav caricature, he portrays a far more complex reality. The chav stereotype, he argues, is used by governments as a convenient figleaf to avoid genuine engagement with social and economic problems and to justify widening inequality. Based on a wealth of original research, *Chavs* is a damning indictment of the media and political establishment and an illuminating, disturbing portrait of inequality and class hatred in modern Britain. This updated edition includes a new chapter exploring the causes and consequences of the UK riots in the summer of 2011.

uk newspaper political spectrum: **Newspaper Journalism** Peter Cole, Tony Harcup, 2009-12-01 Are newspapers faced with an existential threat or are they changing to meet the challenges of a digital world? With the newspaper's role in a state of fundamental redefinition, *Newspaper Journalism* offers a timely and up to the minute analysis of newspapers today, in the context of their historical importance to society. Drawing on their extensive experience in academia and also across local, national, mainstream and alternative newspapers, Cole and Harcup write clearly and engagingly from both industry and scholarly perspectives, and contend that, far from dying, newspapers are doing what they have always done: adapting to a changing environment. This text is essential reading for all students of the press, with comprehensive and critical coverage of the most important debates in the study of newspaper journalism - from ethics and investigative journalism to political economy and the future of the industry. Given the shifting boundaries and central importance of newspapers, it will be of interest to all students of journalism and the media. Praise for the Journalism Studies: Key Texts series: 'It is easy to describe a good textbook for a

specific journalistic format... The ideal book has to satisfy a list of requirements that are also bullet-pointed in journalism assignment outlines. A text has to: synthesize the existing body of knowledge; explain concepts clearly; have a logical order of topics; and provide enough information and directions to pursue further study. One may also hope it would include real life examples and be lucid, vivid and a pleasure to read. Hard to find? Not anymore. The new SAGE series Journalism Studies: Key Texts satisfies the main requirements on the list. Carefully planned and meticulously edited by Martin Conboy, David Finkelstein and Bob Franklin, the textbook series is a welcome contribution to the literature of journalism studies... All three books follow the same structural template: an overview of historical development; explication of the political and economic frameworks within particular types of journalism; a review of contemporary practices; social demographics; a comparative analysis of practices around the world; a summary of main conceptual approaches; an indication of future directions; recommendations for further reading. This strong organization resembles a template for a course outline. This is intentional because the series is aimed both at students and their practice-based lecturers, who often come straight from industry and need time to adjust to the academic environment... [The series] achieves its aim to bridge the sometimes too evident dissonance between journalism theory and practice... They successfully situate discussions about journalism in social and historical contexts. We see the faces of individual journalists, the circumstances of news production, the relationship with owners, the battle between the public service and the profit nature of news, the relevance of journalism work. The detailed account of the conditions under which newspaper, radio and alternative journalism is produced and performed make the Journalism Studies: Key Texts series mandatory reading for both journalism students and their lecturers' - Verica Rupar, Journalism Studies

uk newspaper political spectrum: *The Circulation of Anti-Austerity Protest* Bart Cammaerts, 2018-03-06 In this book a set of theoretical and methodological resources are presented to study the way in which protest, resistance and social movement discourses circulate through society and looks at the role of media and of communication in this process. Empirically, the focus of this book is on the UK's anti-austerity movement. 'The Circuit of Protest', as developed in this volume, is comprised of an analysis of the discourses of the anti-austerity movement and their corresponding movement frames, and the self-mediation practices geared at communicating these. The mainstream media representations and the reception of the movement discourses and frames by non-activist citizens are also studied. It is concluded that studying a movement through the prism of mediation provides a nuanced assessment in terms of failures and successes of the UK's anti-austerity movement. The book is of relevance to students and researchers of politics, social movements, as well as media and communication, but also to activists.

uk newspaper political spectrum: *Pulling Newspapers Apart* Bob Franklin, 2008-03-07 *Pulling Newspapers Apart: Analysing Print Journalism* explores contemporary UK national and local newspapers at a significant and pivotal moment in their development when some pundits are busily, if mistakenly, announcing their demise. The book offers a detailed examination of features which previous studies have tended to neglect, such as editorial formats (News, Op Ed pages, readers' letters, cartoons, obituaries, advice columns, features and opinion columns), aspects of newspaper design (page layout, photographs, supplements, online editions, headlines, the emergence of the compact and Berliner editions), newspaper contents (sport, sex and Page 3, royalty, crime, moral panics and politics) as well as the content of newspapers which is not generated by in house journalists (advertising, TV listings, horoscopes, agency copy and public relations materials). This innovative and accessibly written collection provides journalism and media students with an invaluable study of newspapers in the digital age.

uk newspaper political spectrum: Manufacturing Consent Edward S. Herman, Noam Chomsky, 2011-07-06 A compelling indictment of the news media's role in covering up errors and deceptions (The New York Times Book Review) due to the underlying economics of publishing—from famed scholars Edward S. Herman and Noam Chomsky. With a new introduction. In this pathbreaking work, Edward S. Herman and Noam Chomsky show that, contrary to the usual image of the news media as cantankerous, obstinate, and ubiquitous in their search for truth and defense of justice, in their actual practice they defend the economic, social, and political agendas of the privileged groups that dominate domestic society, the state, and the global order. Based on a series of case studies—including the media's dichotomous treatment of "worthy" versus "unworthy" victims, "legitimizing" and "meaningless" Third World elections, and devastating critiques of media coverage of the U.S. wars against Indochina—Herman and Chomsky draw on decades of criticism and research to propose a Propaganda Model to explain the media's behavior and performance. Their new introduction updates the Propaganda Model and the earlier case studies, and it discusses several other applications. These include the manner in which the media covered the passage of the North American Free Trade Agreement and subsequent Mexican financial meltdown of 1994-1995, the media's handling of the protests against the World Trade Organization, World Bank, and International Monetary Fund in 1999 and 2000, and the media's treatment of the chemical industry and its regulation. What emerges from this work is a powerful assessment of how propagandistic the U.S. mass media are, how they systematically fail to live up to their self-image as providers of the kind of information that people need to make sense of the world, and how we can understand their function in a radically new way.

uk newspaper political spectrum: Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855-2010 Carole O'Reilly, Josie Vine, 2022-11-30 This book examines the micro-cultural ideologies of the journalism profession in Britain and Australia by focusing on the design, execution and development of newspaper building architecture. Concentrating on the main newspaper buildings in some of the major metropolitan areas in Australia (Melbourne, Sydney, Adelaide) and the UK (Manchester, London, Edinburgh and Liverpool) from 1855 to 2010, Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855-2010 interweaves a rich analysis of spatial characteristics of newspaper offices with compelling anecdotes from journalists' working lives, to examine the history, evolution and precarious future of the physical newsroom and the surrounding interior and exterior space. The book argues that newspaper buildings are designed to accommodate and extend journalism's professional values and belief systems over time and that their architecture reflects ideological change and continuity in these value and belief systems, such as the evolution from trade to profession. Ancillary factors, such as the influence of the newspapers' owners on the building design and the financing of new structures are also considered. As professional practice rapidly shifts out of the newspaper offices, this insightful study questions what this may mean for the future of the industry. Newspaper Building Design and Journalism Cultures in Australia and the UK: 1855-2010 will benefit academics and researchers in the areas of media, journalism, cultural studies and urban history.

uk newspaper political spectrum: Euroscepticism, Democracy and the Media Manuela Caiani, Simona Guerra, 2017-02-22 This volume focuses on the relationship between the media and European democracy, as important factors of EU legitimacy. The contributors show how the media play a crucial role in making European governance accountable, and how it can act as an intermediate link between citizens and their elected and unelected representatives. The book focuses on widespread levels of Euroscepticism and the contemporary European crisis. The authors present empirical studies which problematize the role of traditional media coverage on EU attitudes. Comparisons are also drawn between traditional and new media in their influence on Euroscepticism. Furthermore, the authors analyse the impact of the internet and social media as new arenas in which Eurosceptic claims and positions can be made visible, as well as being a medium used by political parties and populist movements which contest Europe and its politics and policies. Euroscepticism, Democracy and the Media will be of interest to students and scholars with

an interest in European politics, political parties, interest groups, social movements and political sociology.
